MEIGLOBAL

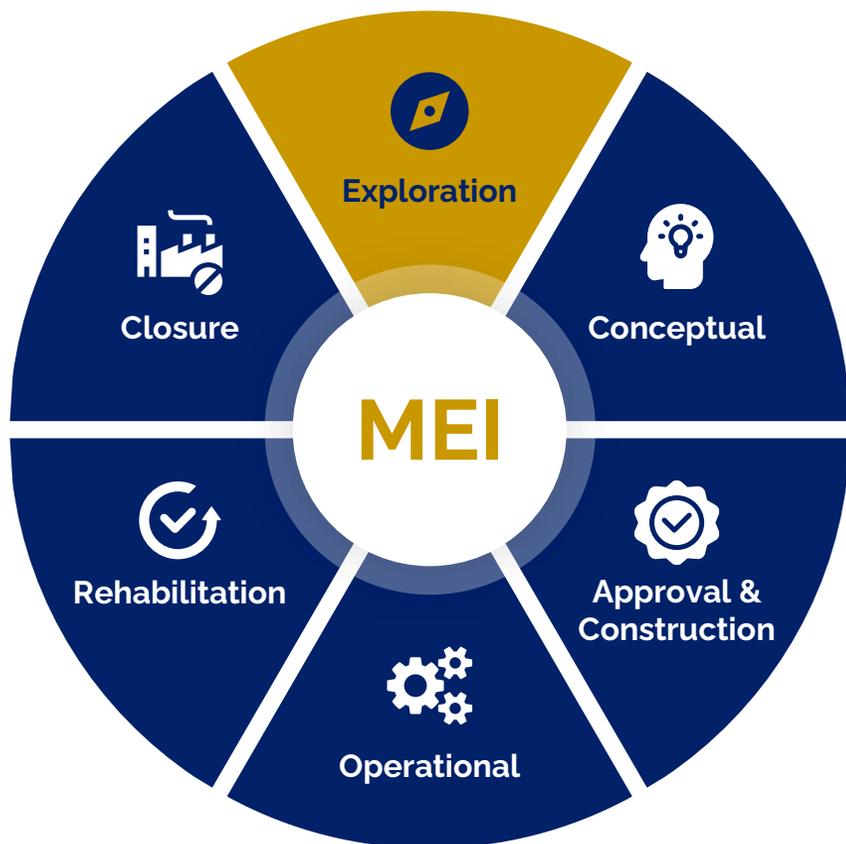

Our Commitment: Environmental, Social, and Governance

MEI is an innovative company with focus on extractive industries environmental and social management capabilities for every stage of the mining lifecycle. Environmental, Social, and Governance (ESG) has rapidly evolved in recent times. Expectations have increased significantly, and mining organizations must ensure that they have frameworks in place to manage and mitigate environmental and social risk with the general public and investors expecting more rigorous governance and increased transparency.

Establishing and maintaining your unique framework for ESG is where MEI Global's services can assist locally. We understand that establishing and enhancing your corporate reputation and capturing your organization's efforts in matters of environment and community is paramount.

MEI Services

Assessment & Approvals

Strategic planning for your asset development plans

We will assist you to develop a detailed understanding in what environmental, social and policy risks are relevant for your project and a strategic plan for your asset.

Owner's Team Representation

We provide confidential decision-making support in terms of approvals processes and advise on how to overcome technical and legislative challenges.

Environmental and Social Impact Assessment

Technically accurate, publicly accepted, and quality focused. We can guide your projects through impact assessment process that set the stage for funding and operational success.

Social analysis and risk assessment

We have the global expertise to conduct a preliminary analysis of the local stakeholder context and advise clients of potential social risks and pitfalls, assisting you to build your social license from the earliest days of exploration.

Global Experience

We can assist you with your environmental planning and approvals needs.

Integrated Project Management

We can integrate with your project team to provide project management services and can establish and maintain your project scheduling and cashflow forecasting throughout the approvals process.

Qualified Professionals

We are a team of practical and experienced professionals with the common goal of taking a holistic view of your project's approval process while considering commercial and operational requirements.

Quality Focused

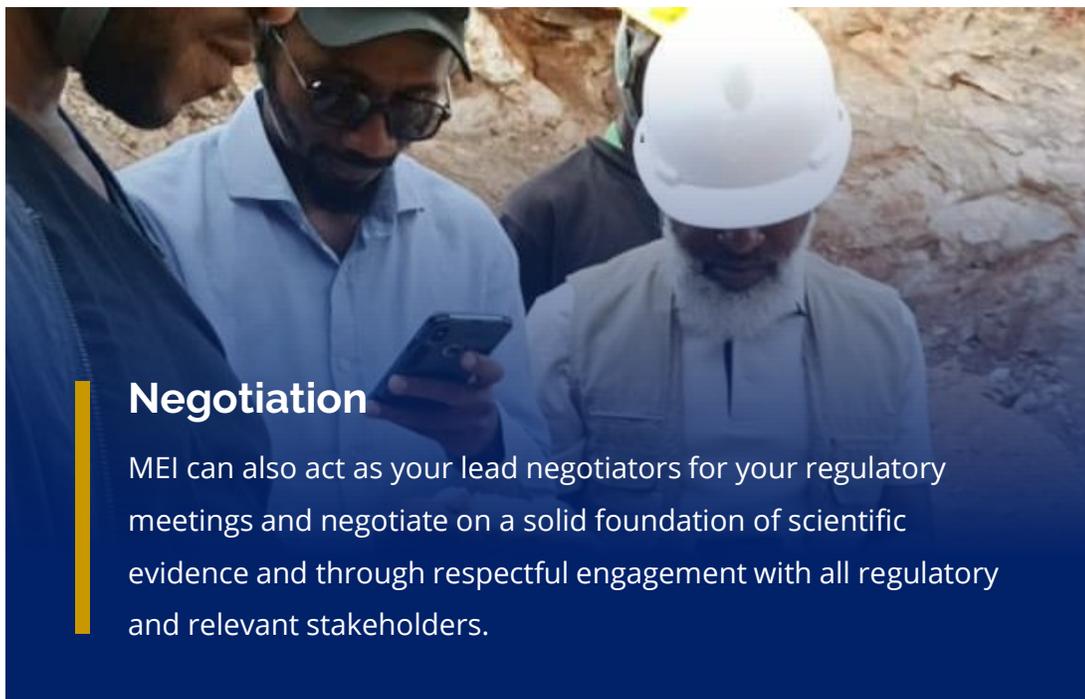

MEI's project delivery system prescribes how our projects are managed and delivered to ensure that consistent quality is provided across our projects for their duration.

MEI Services

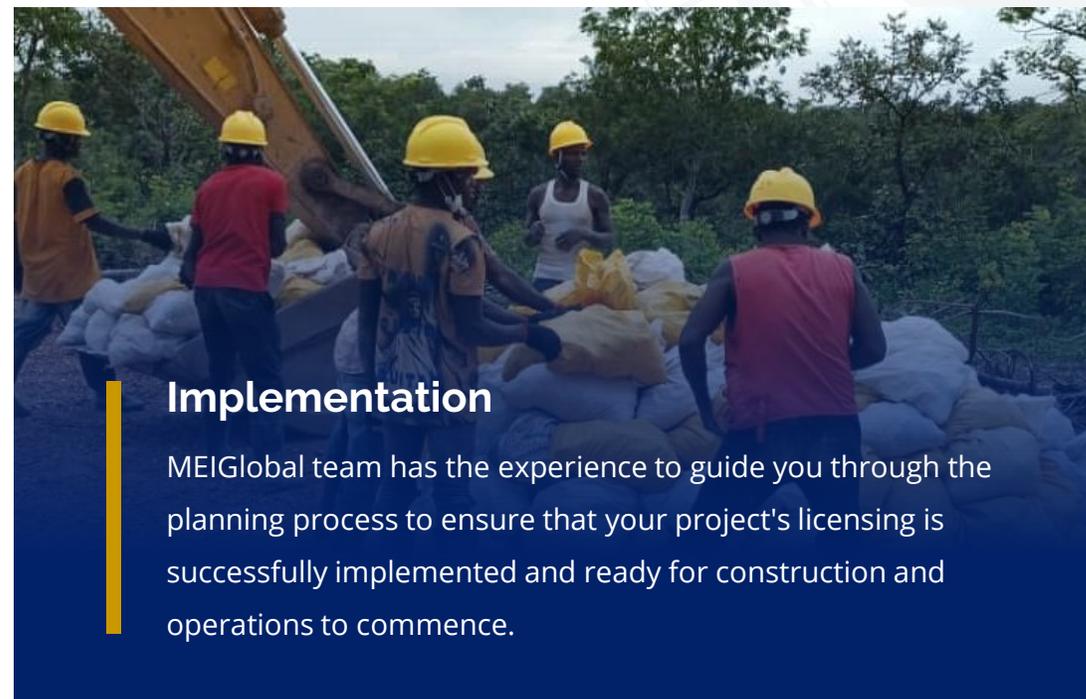

Environmental Licensing

Ensuring you have an operationally functional licence from day one

Negotiation

MEI can also act as your lead negotiators for your regulatory meetings and negotiate on a solid foundation of scientific evidence and through respectful engagement with all regulatory and relevant stakeholders.

Implementation

MEIGlobal team has the experience to guide you through the planning process to ensure that your project's licensing is successfully implemented and ready for construction and operations to commence.

MEI Services

Social Assessment & Human Rights

MEIGlobal understands the social risks facing modern mining. The financial risks to projects and operations are significant.

We can help you establish early stakeholder engagement to secure exploration social license to operate which lays a foundation for long term project stability.

We analyse - at any stage of the project life cycle - social risks and social acceptance, leading to a social engagement strategy built on local context, reducing your risk to local anti-mine conflict.

Stakeholder Engagement, grievance management and local benefit allocation - whether training, jobs or supply chain - are the three keys social performance at a mine site.

We will assist you to develop and implement a fit-for-purpose grievance management system.

Prior to construction, we will help you ensure that social impacts have been identified and mitigated.

We have decades of experience developing, reviewing and implementing environmental and social management systems, including policies, management plans, and monitoring systems.

Preparation for lenders requirements related to Equator Principles 4 or IFC Performance Standards.

We are skilled at engaging Indigenous rights and advising companies on their Free Prior Informed Consent (FPIC) obligations.

We understand the importance of Human Rights and the methodical implementation of the Voluntary Principles on Security and Human Rights.

MEIGlobal offers services to establish a shared vision with local stakeholders for social closure and post-mine land planning.

MEI Services

Environmental and Social Management Systems

Environmental and Social Management Systems (ESMSs) are vital for ensuring ongoing compliance and are about so much more than simply paperwork. Globally there is an increasing regulatory and public focus upon operational compliance with environmental licensing and legislation.

To effectively manage compliance the legal obligations, risks, and operational practices specific to your site must be considered from the outset of your ESMS design.

The MEI team is well placed to share our knowledge and support your operational requirements for ESMS design and implementation.

Operational Environmental Management Support

We are experienced in the management of construction and development and can provide ground disturbance management and systems design support during this time, as well as provide advice and support on:

Licensing Commitments

Environmental Monitoring Requirements

Compliance Audits and Reporting

In addition, we are experienced in crisis management and can provide support to assist with investigation and compliance management associated with environmental and social performance issues

MEI Services

Environmental and Social Auditing and Compliance

We work closely with organization to identify risks, develop appropriate mitigation, facilitate improvements to environmental compliance and social performance, and meet statutory audit requirements

We have secured a strong reputation for providing practical and pragmatic advice to mining clients to assist them to meet the requirements as part of their project financing. This is a highly unique role that allows us to support your journey to compliance with these global high standards whilst providing support on your funding journey. During this period of engagement, we work closely with your organization and funding organization to determine the applicable standards for the operation and organization in question and assist with the development of the pathway forward providing certainty for all parties about the associated environmental and social actions required.
